

InterApp Academy – your gateway to mastering industrial applications

Face-to-face and digital trainings

Green hydrogen process

Subsystems of the PEM-method

The green hydrogen production system can be divided into twelve subsystems:

1. Feed water
2. Water purification
3. Recirculation
4. Electrolysis
5. Power supply
6. Cooling
7. Hydrogen treatment
8. Oxygen handling
9. Storage
10. Hydrogen transportation
11. Waste handling
12. Control

The diagram illustrates the complex piping and components of a PEM electrolysis system. A legend indicates the color coding for different media: Water (blue), Hydrogen (red), Oxygen (green), and Wastewater (grey). The system includes a feed water tank, purification units, electrolysis cells, and various treatment and storage tanks.

Elevate your expertise in industrial valves

At InterApp Academy, we are dedicated to fostering continuous learning and professional growth.

Our Academy offers an extensive array of digital and in-person courses and training opportunities, providing an in-depth enhancement of your knowledge regarding industrial valves and their diverse applications across various industries.

Whether you prefer to learn at your own pace or alongside our expert specialists, we have the perfect solution for you.

Join us in this new chapter, elevate your expertise, and discover new opportunities for your industry.

Spectrum of offerings

Product courses

InterApp product courses enhance your understanding of our valves and their applications across various industries.

By choosing these courses, you will expand your knowledge about our butterfly valves and the different materials they are made from, as well as increase your awareness of how our valves can be utilised in different industrial settings.

- Online course accessible via ValveFinder® upon subscription

Application courses

Are you looking to enhance your knowledge about a specific industry and its processes?

Our InterApp training courses are thoughtfully designed to provide you with an extensive understanding of various industries, their processes, and the most suitable InterApp valve solutions for each.

- Online course accessible via ValveFinder® upon subscription
- Please contact your InterApp sales contact for full access

Webinars

Participate in our live training sessions and webinars to deepen your product and application knowledge.

Our specialists will immerse you in the world of industrial valves and are available to answer your specific questions. Each webinar lasts approximately 45 minutes to 1.5 hours.

- See training calendar published on www.interapp.net
- Access upon subscription

Trouble Shooting

Are you facing a specific valve challenge in your process that falls outside the warranty scope and need assistance from a specialist?

If so, our experienced specialists are ready and happy to provide you with the support you need.

Whether it's troubleshooting, detailed technical advice, or tailored solutions, we are here to help you navigate and resolve your valve-related issues efficiently.

- Please contact your InterApp sales contact

Customised trainings

In some cases, you may be interested in specific training for your team members or customers.

Depending on your needs, we are happy to prepare a tailored training session. Whether it's focused on a particular product, industry, application, or process, we are committed to providing customised training solutions to meet your unique requirements.

- Please contact your InterApp sales contact

We are there for you. Anywhere, anytime.

As an international company with extensive product and project expertise, we support you with our sales partners and our technical support team in all parts of the world.
